About Amgen

Our Mission: To Serve Patients

Amgen harnesses the best of biology and technology to fight the world’s toughest diseases, and make people’s lives easier, fuller and longer.

We helped establish the biotechnology industry more than 40 years ago and remain on the cutting-edge of innovation, using technology and human genetic data to push beyond what’s known today.

Our investment in research and development has yielded a robust pipeline that builds on our existing portfolio of medicines to treat cancer, heart disease, osteoporosis, inflammatory diseases and rare diseases.

REACHING SERIOUSLY ILL PATIENTS WORLDWIDE

We have a presence in approximately 100 countries and regions worldwide and our innovative medicines have reached millions of people in the fight against serious illnesses. We focus on four therapeutic areas: general medicine, rare disease, inflammation and oncology, delivering innovative medicines to help people live longer, fuller, happier lives.

ACCELERATING THERAPIES FOR PATIENTS WITH CUTTING-EDGE SCIENCE

We combine our understanding of human genetics and disease biology with advanced science and technologies, like protein engineering and AI capabilities, to identify and deliver the most effective treatments for people living with some of the world’s toughest diseases.

MAKING MEDICINES SAFELY AND RELIABLY

Many of Amgen's medicines are made through a highly complex process involving living cells. We're committed to delivering for "every patient, every time", and we have a long-running reputation for the reliability of our supply chain.

OPERATING RESPONSIBLY

Making a positive difference in the world is at the heart of what we do at Amgen – and it goes beyond making vital medicines. We also help build a better world by focusing on corporate sustainability issues that matter most to our business and our stakeholders. Amgen's Sustainability Framework is built on four pillars:

- **Healthy People** - We focus on removing barriers that limit equitable access to healthcare so that people can live their healthiest lives.
- **Healthy Society** - We work to support our employees and the people we serve.
- **Healthy Planet** - We prioritise sustainability and aim to minimise our environmental impact to preserve natural resources for generations to come.
- A **Healthy Amgen** - We hold ourselves to high standards in our operations and continually strive to reflect Amgen values in our culture, products and strategy.

About Amgen Australia

Established in 1991 and headquartered in Sydney, Amgen Australia works to further the company's global efforts to transform the promise of biology and technology into therapies that restore health and save lives. Hundreds of thousands of Australians use one of Amgen's products¹ and thousands more have been enrolled in clinical studies¹ that have helped deliver the next generation of innovative treatments. Amgen Australia is proud to support these patients and to contribute to the development of new therapies in partnership with Australia's leading healthcare, academic, research, government and patient organisations.

INVESTING IN LOCAL RESEARCH AND DEVELOPMENT

Amgen maintains an extensive clinical trial program and invests significantly in local research and development. Amgen's history of clinical trial activity in Australia dates back over 35 years and our reputation for quality and safety continues to make us one of the most trusted destinations in the world for Amgen research. In 2024, this included 875 Australian patients, participating in 41 clinical trials at leading Australian hospitals.¹

WORKING SUSTAINABLY IN OUR COMMUNITY

Each year, Amgen commits significant resources to help make a difference in the local community. This includes:

- **The Amgen Foundation** – reimagining and expanding access to science education. The Amgen Foundation works with dedicated nonprofits and universities to provide best-in-class science education programs free of cost to teachers and students with the goal of advancing science literacy and inspiring the next generation of innovators. The Amgen Biotech Experience has been educating high school students in NSW about the concepts and techniques used to produce medicines since 2017. The Amgen Scholars program has been providing hands-on research experience to undergraduate science students across Australia, New Zealand and Oceania since 2018.
- **Diversity, Inclusion and Belonging** – celebrating the diversity of our people and partnering to learn more about how Amgen can take meaningful steps to continue our Reconciliation journey. We are also currently partnering with the Australian Cancer Research Foundation in their efforts to empower women in cancer research.
- **Patient Organisation Support** – working with Healthy Bones Australia, Lung Foundation Australia, National Heart Foundation, Prostate Cancer Foundation of Australia, Heart Support Australia, Global Healthy Living Foundation Australia, Patient Voice Initiative, Patients Australia and others to provide information and support that improves prevention, diagnosis, treatment, and survival.
- **Staff Volunteering** – providing paid charity leave so staff can donate person-hours to support local charities individually and participate in team-based volunteering opportunities. Each year, hundreds of hours of assistance are provided to people and organisations in need.
- **Environmental Sustainability** – designing practices to measure and reduce our environmental impact, particularly regarding product packaging.
- **Health Policy** – advocating for policies that will improve and protect the health of patients with serious illnesses, support advances in clinical development and enhance access to medicines.

OFFERING REWARDING CAREERS
